

Betsy Smith graduated Cum Laude from the University of Georgia with a BS in Environmental Health. She obtained her MPH in Epidemiology from Emory University. While attending Emory, she served as a Research Associate at the Centers for Disease Control in Atlanta, GA with the Division of Healthcare Quality Promotion. After graduating, she moved to Memphis, TN and served as a Data Analyst for the Department of Preventive Medicine at the University of Tennessee Health Science Center. She worked on two NIH-funded grants and taught a Biostatistics course for health department employees as part of the Tennessee Public Health Workforce Consortium. Betsy joined the Mercer faculty in 2004. She teaches Biostatistics to the medical students and Internal Medicine residents. She assists in study design, methodology, and database design for research projects. She also performs statistical analyses for research projects. She has served on the Research Committee at Mercer, and she is a member of the American Public Health Association and the Georgia Public Health Association.
